

Delivering to Building Sites

Building A Better Environment

Everyone associated with the building industry is being asked to prevent any pollution from entering the stormwater system because everything that goes down the drain ends up in our waterways.

The following hints are aimed at helping you, the person responsible for delivering goods to building sites, to keep our stormwater systems, rivers and beaches free from pollution.

Site Disturbance

- Vehicles should enter and leave the site on the access driveway to limit the tracking of mud, sand or soil on to roads.
- If any mud, sand or soil is deposited on the roadway, please remove it as it is your responsibility to clean any deposit left by your vehicle.
- Limit disturbance at a site when delivering materials.
- Always ensure that loads are covered to eliminate any materials blowing off.

WARNING: On the spot FINES apply
